Business Analyst | Project Coordination | PMO Support | CAPM Certified

PROFESSIONAL SUMMARY

Business analysis and project delivery professional with experience supporting digital and operational change initiatives across healthcare and technology environments. Skilled in stakeholder engagement, requirements gathering, process improvement, governance reporting, risk and issue tracking, and cross-functional collaboration. Experienced in supporting Agile delivery, backlog refinement, sprint planning, and documentation that helps teams deliver value across people, processes, and technology. CAPM certified and now targeting Business Analyst opportunities where I can contribute to transformation, service improvement, and effective change delivery.

CORE SKILLS

Business Analysis · Requirements Gathering · Functional & Non-Functional Requirements · Stakeholder Management · Workshop Facilitation · Process Mapping · As-Is/To-Be Analysis · Root Cause Analysis · Agile & Waterfall · Backlog Refinement · Sprint Planning Support · User Stories · Governance Reporting · RAID Log Management · Risk & Issue Tracking · Change Control Support · UAT/Test Support · Data Analysis & Reporting · Cross-functional Collaboration

EXPERIENCE

Trust Recruitment Coordinator & Onboarding Specialist · NHS Professionals (NHSP) · United Kingdom · May 2025 – Present

Project Coordination | PMO Support | Workforce Transformation

- Coordinate multiple concurrent workstreams across NHS Trusts, maintaining delivery plans, timelines, and governance requirements across onboarding and workforce change activity.
- Partners with Trust leadership, HR teams, and operational stakeholders gather requirements, clarify service needs, align delivery priorities, and remove blockers affecting implementation.
- Maintain action, risk, dependency, and issue tracking to support delivery governance, escalate concerns appropriately, and help manage change in a controlled and traceable way.
- Produce workforce dashboards, status updates, and structured reports that support data-driven decision-making, progress tracking, and continuous improvement.
- Support process improvement initiatives by identifying workflow gaps, analyzing current onboarding activities, and contributing to more efficient ways of working and better service outcomes.

Associate Consultant · Cognizant Technology Solutions · India · Feb 2022 – Aug 2023

Delivery Support / Agile Project Coordination

- Supported Agile delivery by contributing to sprint planning, backlog refinement, progress tracking, and stakeholder updates to keep work aligned with business priorities and delivery goals.
- Worked with cross-functional teams and stakeholders to understand business requirements, analyze geospatial data workflows, and support process improvements that enabled more accurate and efficient delivery outcomes.
- Prepared progress reports, delivery summaries, and performance insights for senior stakeholders, enabling informed decision-making, issue visibility, and stronger delivery governance.
- Supported team capability by mentoring junior analysts and sharing structured ways of working, contributing to stronger collaboration and improved delivery performance.
- Recognized for strong analytical problem-solving and for resolving complex delivery issues that supported continuity and service quality.

Content Manager · Vega Prosys · India · Feb 2021 – Feb 2022

Project Delivery | Agile Transformation | Stakeholder Management

- Took ownership of a project originally planned for 15 months, analyzed the delivery landscape, identified bottlenecks and risks, and created a clearer path to accelerate execution.
- Applied Agile principles and structured delivery practices to improve workflow efficiency, align stakeholders, and complete the project in 10 months instead of the original 15-month timeline.
- Coordinated with internal teams and stakeholders to maintain momentum, resolve blockers, and keep delivery focused on business outcomes and timeline commitments.

Full-Stack Developer · IT Aspects · India · Feb 2020 – Feb 2021

Technical Delivery & Stakeholder Coordination

- Worked closely with clients and internal stakeholders to clarify requirements, align priorities, and support smooth delivery of technical solutions.
- Resolved priority issues and supported service continuity, helping improve client satisfaction and maintain delivery momentum.
- Adapted quickly to new tools and project needs to support high-priority delivery, demonstrating flexibility, responsiveness, and a strong learning mindset.
